

**Easy
turning**

Positioner
INVERTO

PFEIFER

Easy turning

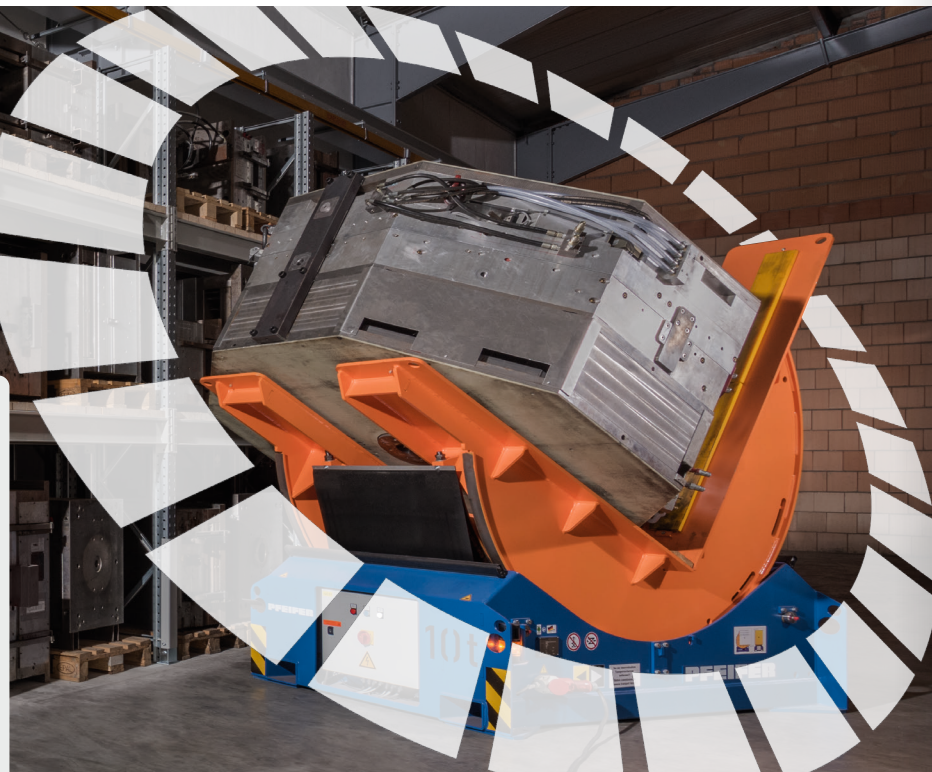

Rotating and turning components, often no easy task in manufacturing!

Turning over is not difficult.
Turning over heavy loads isn't either.
When you know how, and with what!

No risk. No crane.

Turning made simple and safe:

- Avoid hazards from slings and chains that can damage sensitive load edges.
- The improvised and dangerous methods for turning loads over that are still all too common in practice are no longer necessary!

You have ...

... heavy and bulky loads of up to 30 t such as

- dies
- injection moulds
- steel coils
- paper rolls
- or reels

... to be turned by 90° safely and easily?

... the INVERTO is here to help:

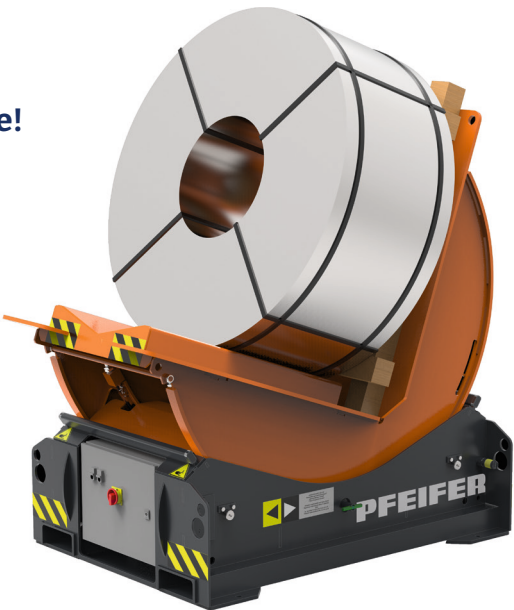

This positioner makes turning safe.
It doesn't just protect the load, it adapts to it with its flexible tabletops, wherever a power supply is available!
Mobile, flexible and ready for use in minutes.

PFEIFER INVERTO

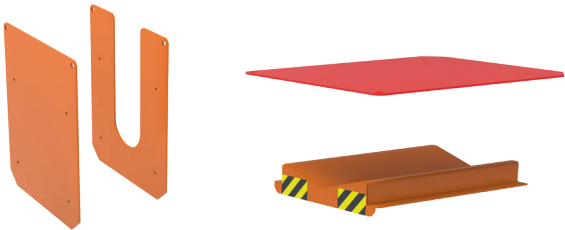

- + Gentle**
A frequency converter ensures a slow start and a slow finish, with fast movement in between to keep turning time to an absolute minimum.
- + Mobile**
Fork pockets allow the positioner to be transported by forklift to wherever you need it, whether in different production areas or at different sites. All it needs is a 400 V socket, nothing more.
- + Modular**
The INVERTO can be configured to your needs with interchangeable tabletops that can also be retrofitted at any time.
- + Teach-in function**
The turning angle can be individually defined and stored, ready to be repeated at the push of a button.

Size

Working load limit in kg	Tabletop size in m
2,000	0.9 x 0.7 x 0.9
8,000	1.3 x 1.0 x 1.3
15,000	1.5 x 1.2 x 1.5
30,000	2.0 x 1.5 x 2.0

- + Safe**
A solid enclosure or built-in safety edges protect against injury and stop the turning process if there is a risk of trapping or crushing.
Acoustic and visual warning signals add safety when the turning process begins.
- + Flexible thanks to a 180° rotating unit.**
→ for loading and unloading from the same side.
- + Versatile with different tabletops:**
 - **for coils**
Tabletop with cut-out for easy loading and unloading with coil hooks, V-block prism
 - **for injection moulds**
Both tabletops without cut-out
 - **for sensitive loads**
Tabletop or V-block prism with PU coating

Convinced? – Order now:

WLL [kg]	Tabletop size [m]	Connection data [kW – V – Hz]	Turning time [s]	Dead weight [kg]
2,000	0.9 x 0.7 x 0.9	1.1 – 400 – 50	25	560
8,000	1.3 x 1.0 x 1.3	2.3 – 400 – 50	35	1260
15,000	1.5 x 1.2 x 1.5	4.7 – 400 – 50	35	2,300
30,000	2.0 x 1.5 x 2.0	4.7 – 400 – 50	60	4,800

Tabletop:

- ☐ without cut-out
- ☐ with cut-out
- ☐ with prism
- ☐ with PU coating

Further options:

- ☐ 180° rotating unit
- ☐ Cable reel with spring retraction – length 15 m

Delivery time:
8 Weeks.
Simply unbeatable!
